

L-R: Dan Horsfield, Steve Cooper,
Andrew J Coy, Mike Teare

Expert help at hand

A problem shared is a problem solved...

Businesses, homes, schools, in fact most types of organisations now rely on ICT, computers and the internet. When they are working properly they are a dream but, if you run into a problem they can quickly turn into a nightmare, and that's when it's time to call in the experts.

Killer-Byte, the mobile ICT engineers for home and business, are there to offer their expertise and solve any problems you may have, as soon as possible. Based in the Halfway area of Sheffield and managed by Andrew J Coy, an ICT systems engineer, and his team, each a specialist in their own field of ICT, they have a combined experience of over 70 years.

Mike Teare deals with web development services, including website design, maintenance and updates, as well as software engineering – producing bespoke software packages to suit any requirement. Prices start from as little as £150 for a basic website and he can also maintain it to take the stress and worry out of managing it.

Dan Horsfield is the commercial/business expert. He has an in depth knowledge of server management and corporate networks, from small business to large organisations. This experience allows Killer-Byte to offer services such as server migrations (including Microsoft Exchange), maintenance and administration and free Blackberry alternatives. Killer-Byte also offer a complete ICT outsourcing program for smaller businesses who may not be able to employ a full time technician or larger business who are looking to make savings in today's economic climate. This can be done on a contract or PAYG basis.

Killer-Byte provides support to most of the schools in the Dronfield area, as well as many more in South Yorkshire and Derbyshire. Tricia Barrat is the lady who deals with the school

contracts. There is nothing that can't be done, from a simple job of replacing a monitor to setting up a new server. Keeping technology up to date allows the staff and students easy and efficient use of ICT. All the staff at Killer-Byte have undergone a Criminal Records Bureau check and certificates can be presented upon request or new checks carried out. For more information on school projects see www.killer-byte.co.uk/schools.

Despite providing support for many businesses, homes and charities, Killer-Byte still provides a full home service. This is led by Steve Cooper, the home technician. At just £30 per hour, prices are very competitive. There is no callout charge if you are within ten miles of the business and there is a free estimate service for work, so you can decide swiftly whether or not to go ahead with a job. Steve can come to you and quickly and efficiently assemble most PC equipment or solve any IT problems you may have.

Killer-Byte can provide complete project management, from sourcing to installing and the removal of old equipment. They have a massive selection of reconditioned PCs, starting from £80 up to £280 for newer models, including installation. There are also new laptops from £300. All the computers are high spec, broadband ready and fully guaranteed.

Whatever your dilemma, they have someone to solve it. From large companies to home users, the team's expertise at Killer-Byte is there for everyone.
